

Academic Database Seminar Web of Science (Clarivate Analytics)

Don't be overwhelmed by the flood of information !
How to find in 30 seconds the article you really need to read

Are you troubled by such thoughts?

Research, lectures, application documents ...I'm always pressed for time!

I'm no good at reading English...
It's such a pain!

Even though I'm doing my research, there's my part-time job and my university club!

If you said "yes" to any of the above, make sure to join our seminar.

In just 90 minutes, you can master **Web of Science** and **EndNote Online** for the retrieval and management of articles. These tools are the powerful allies of time management. They "**find important literature quickly**" and "**retrieve it at anytime**".

Whether you've been using the databases your own way or they are new to you, why not find useful information for your research with the tools provided by the university?
